CO48PM Honeywell Evaporative Air Cooler

Cools up to 610 square feet* (indoors) and air-throw up to 9.4 yards for outdoor use

Product Features:

- Weather resistant for outdoor use
- Natural, energy efficient cooling with no compressor
- Honeycomb Cooling Media on three sides for faster cooling performance
- Unpack, add water, plug it in, and use!
- Air-throw up to 9.4 yards for outdoor use
- Cools up to 610 square feet* (indoors)
- Power consumption of 140 watts only
- Powerful air flow of 1062 CFM (30 CMM)
- Top loading water inlet and ice compartment
- Continuous water supply connection for uninterrupted operation
- 14” fan blade for powerful air throw
- Easy-to-use mechanical controls
- Oscillating louvers
- Durable casters for easy mobility

Product Description:

The Honeywell CO48PM Evaporative Air Cooler is the perfect choice to keep indoor and outdoor environments comfortably cool and breezy. An UV resistant and water-resistant body along with outdoor grade electrical components makes the CO48PM suitable for outdoor use. Its powerful motor delivers strong air flow while a 14” fan blade and honeycomb cooling media on three sides ensure

optimal performance. A continuous water supply connection, 12.6 gallons water tank, and built-in overflow protection system allow long periods of unattended operation, making it perfect for demanding applications. The cooler has durable casters for easy mobility from one space to another. The oscillating louvers evenly distribute the air and horizontal louvers can be manually adjusted to change the vertical airflow. For use indoors, the unit should be placed near an open door or window. The cooler can also be used to humidify dry air during cool seasons.

Natural, energy-efficient cooling with no compressor: The CO48PM is built to maximize energy efficiency and keep costs low. Warm air is drawn into the Honeycomb Cooling Media from three sides. Water pumped from the tank pours over the media and as the warm air passes through, the water absorbs the heat, naturally cooling and humidifying the air. A fan propels the cooled air out into the room. This no-compressor system cools naturally, efficiently and inexpensively.

WHAT'S THE SECRET TO HIGHLY EFFICIENT, NATURAL HEAT ABSORPTION? The CO48PM is equipped with Honeycomb Cooling Media made of special cellulose paper and specially designed angles which allow air to travel through at high speed and with little resistance and more surface area to absorb heat from the air. Honeycomb media cools more efficiently than other types of media for the same amount of energy.

Not an Air Conditioner (Important - Please Read!)
The evaporative air cooler is not an air conditioner, as it does not use a compressor or refrigerant gas. It should not be expected to cool as efficiently as a refrigerated air conditioner.

Please refer to the User Manual and Warranty for additional information.

This product has a 1 year limited warranty.

What's In the Box?

- 1 Honeywell CO48PM Evaporative Air Cooler
- Instruction Manual
- Remote control

*under test conditions

Specifications and Dimensions	CO48PM
Recommended Square Footage	610 Sq. Ft
Residential/Industrial	Residential/Industrial
Indoor/Outdoor	Indoor and Outdoor
Type	Portable
Product Height	34.17 in.
Product Width	24.4 in.
Product Depth	14.76 in.
Package Weight	35.3 lbs.
Number of Fan Speeds	3
Amount of Air Moved (Max CFM)	1062 CFM
Air Movement	Fan-Forced
Oscillating Louvers	Yes
Water Reservoir Capacity	12.6 gallons
Water Level Indicator	Yes
Hose Hookup	Yes
Controls	Mechanical
Remote Control	No
Programmable Timer	No
Casters	Yes
Color	White/Black
Voltage	120 V
Watts	140 W
Amperage	1.83 Amps
